

Enrico Dalcanale

Is Professor of Industrial Chemistry in the Department of Chemistry, Life Sciences and Environmental Sustainability at the University of Parma. He graduated in Industrial Chemistry at the University of Bologna in 1981. After eight years as research scientist at the Donegani Research Institute in Novara, he joined the University of Parma in 1990. In 1985-1986, he was postdoctoral fellow in the group of D. J. Cram at UCLA and in 2004 visiting professor at Naval Research Laboratory in Washington, D.C. The research profile of ED's group (www.dalcanalegroup.it) is defined by the supramolecular approach to materials science. The major fields of activity are responsive surfaces, supramolecular polymers and sensors.
