

## **Alessandro Pedrini**

Received his M.S. in Industrial Chemistry from Parma University in 2012. He obtained his PhD in Materials Science from the same University in 2015, working on surfaces decoration with Single-Molecule Magnets and cavitand-based functional materials, under the supervision of Prof. E. Dalcanale. During his PhD tenure, he spent a semester in the group of Prof. T.M. Swager, at the Massachusetts Institute of Technology. After his PhD, he was a post-doctoral fellow at University of Milan – Bicocca in Prof. Sozzani's group for two years. Currently he is Assistant Professor at the University of Parma. His research interests focus on supramolecular chemistry, molecular rotors and switches.
